

# OpenStack Developer Mailing List Digest September 16-22

## Summaries

- [Technical Committee Status update](#)
- [POST /api-sig/news](#)
- [Release Countdown](#)

## PTG

### Survey/polls

- Should we have Upstream Institutes at the PTG? [yay or nay](#)

## Summaries

- [Blazar](#)
- Cross-project
  - [Simplification in OpenStack etherpad](#)
  - [Skip Level Upgrades & Fast Forward Upgrades](#) and [thread](#)
- [Charms](#)
- [Cinder](#)
  - [Team photo](#)
- [Cyborg](#)
- [Docs and i18n](#)
- [Glance](#)
  - [Recaps:](#)
    - [Wednesday](#)
    - [Thursday](#)
- [Neutron](#)
  - [Videos](#)
  - [Team photo](#)
- [Nova](#)
  - [Recaps:](#)
    - [Cells](#)
    - [Placement](#)
    - [Nova and Neutron](#)
    - [Nova and Cinder](#)
    - [Everything else](#)
  - [Team photo](#)
- [Sahara](#)

- [Tricircle](#)
- Triple-O
  - [Triple-O and Ansible](#) and [thread](#)
  - [Team photo](#)
- [QA](#)

### Gerrit Upgrade Update From Infra

- Gerrit emails are slow, because it's sending one at a time
  - [Upstream bug](#)
  - [Patch to apply](#)
- Web UI File Editor
  - Behaving oddly. Might be because of API time outs. Gerty is also having reported problems.
- [Message](#)

### Install Guide VS Tutorial

- Since the [doc-migration](#), people have been having questions regarding the usage of "Install Tutorial" and "Install Guide" in the OpenStack manuals repository and project specific repos.
  - The documentation team agrees this should be consistent.
  - Tutorial's literal translation is "paper, book, film, or computer program that provide practical information about a specific subject."
- From PTG discussions, a distinction made was installation provides one of many possible ways to install the components.
- Consistency is more important than bike shedding over the name.
  - Industry wise, what's the trend?
- [Thread](#)

### Garbage Patches for simple typo fixes

- [Previous thread from 2016 on this](#)
- Various contributors are doing many patches that are typo, style changes.
  - It has been expressed that this can cause CI resource starvation.
- TC created the [Top 5 help wanted](#) to help contributors know where the community needs the most identified help.
- This is a social issue, not a technical issue. Arguing about what is useful and what isn't is probably not worth the effort here.
- Communication and education is probably the best solution here. For repeated offenders, off-list email could be fine to make sure the communication is clear. Communicating this in the new [contributor portal](#) and Upstream Institute would be helpful.
